LISBURN GADGET GROUP

This group meets once a month in the local Further Education College to discuss, try out and engage with all types of technology for the visually impaired.

If you have a device which you find really useful in day to day life, like a talking telephone or an i-pad for reading e-mails bring it along and share your experiences with the group and pick up hints and tips that may help you navigate the world of specialist technology.

Contact Margaret Mulholland or Dianne Roberts at the Sensory Support Team for more details on 028 9260 7746.
